Summer Undergraduate Research Program at Fort Peck Community College

The FPCC NSF-TCUP Summer Undergraduate Research Program provides students with valuable hands-on research and Lab experiences in the field of science. It fosters interest and attracts students into careers in Science and Engineering.

Program Benefits and Highlights:

- 26 college and high school students (currently Juniors & Seniors) can participate in the research project
- Starts June 8, 2015
- Meets in the FPCC Science Building in Poplar, MT
- Work 6-7 weeks during the summer
- Work 30 hours per week
- Earn $12/hour plus Travel Allowance (gas money)
- Receive 3 college credits
- Work on exciting and relevant research projects in the areas of environmental science and alternative energy sources
- Work under the supervision of qualified research scientist
- Chance to attend a national conference where all travel expenses are paid
